

ROAD SURFACING AND REPAIR SYSTEMS

TEK Services Ltd

What is Hot Pour?

- What is Hotpour?
- What product types are there?

Intro to TEK Services

- Most experienced team in NZ
 - New Hot pour products
 - Traditional Resin + aggregate
 - 30+ combined years experience
- Innovators in hot applied products

What is “Hotpour”?

- Combined thermoplastic resin and aggregate in bags
- Heated in specially designed boiler
- Screed-box applied

Why is it different to Resin?

- Traditional Resin installation:
 - Carefully Mix two part Epoxy
 - Lay down coat of resin onto surface
 - Shovel aggregate onto resin
 - Wait 4 – 5 hours for curing
 - Remove excess aggregate
 - Open to traffic

Why is it different to Resin? (cont)

- Hotpour installation:
 - Heat Product and install onto surface
 - Wait 20minutes for curing
 - Open to Traffic
