

Stamark – A Temporary Solution

Michael Holderness

Keeping lines safer
with 3M™ Stamark™ Pavement
Tape Technology

3M

Traditional Temporary Marking

Remove the old marking

- Grind
- Grit, Sand or Hydro Blast

Issues

- Leaves a shadow mark
- The removed line shows up better than the new line at night in the wet

Spray a thin coat of paint

Issues

- Wears off easily
- Has to be removed (as above) at the end of the job

3M

The Stamark Way

- Cover the old marking with black cover tape
 - 3M Stamark Removable Black Line marking tape 715)
- Mark the road with the temporary tape
 - 3M Stamark Wet Reflective Removable Tape 710 White or 711 Yellow
- At the end of the job, peel off the black cover tape and the white temporary tape
- Reveal the original markings

3M

Advantages

- Clean, no dust or dirt, no liquid paint
- Quicker than grinding and painting
- No shadow lines left behind
- Fully reflective at night and in the rain
- Easily removed, just peel off the road

3M

High Profile Locations Where It Has Been Used

- Hamilton V8 Supercar Course
 - Used to remark the road for both the track and the road diversions.
 - The main reasons it was used was ease of use and instant re-instatement of the original markings
- Victoria Park Tunnel
 - Used for the many traffic diversions around the tunnel during construction
