Ensuring our transport system helps New Zealand thrive

We've seen technology transform transport

We've seen sci-fi become sci-fact!

Personal choice will rule...

....Simplicity within complexity...

Paying for transport as a service

Freight demand will grow substantially...

Fast freight: Dedicated corridors and connected logistics systems

Airships – providing new solutions

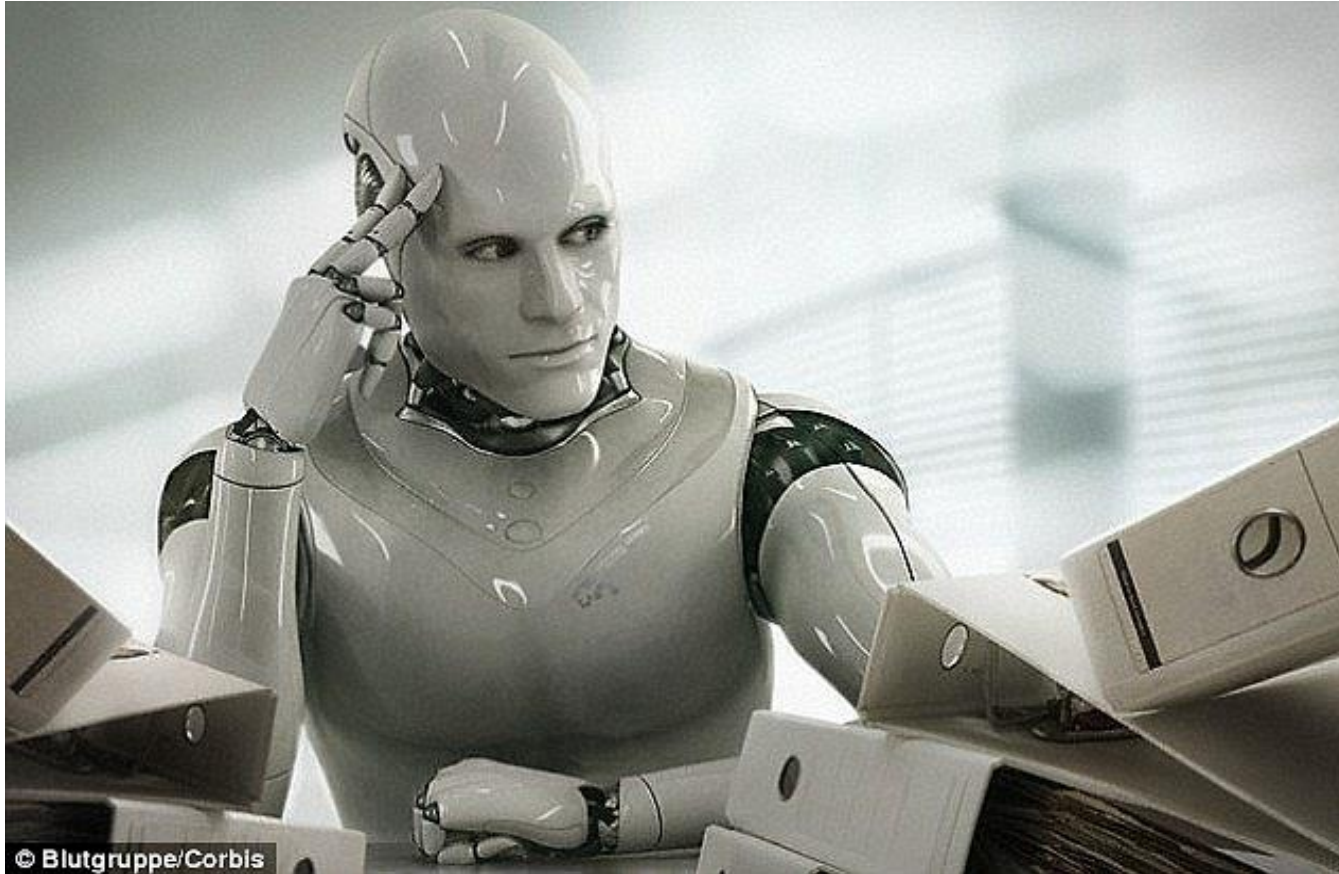

The Last Mile: an alternative use for autonomous vehicles

The air up there: making use of the 'vertical space'

Artificial intelligence: the changing role of Government
