

# RETHINKING DISRUPTION

**Smart Seeds™**  
Fresh ideas for our future infrastructure

## Creating opportunities out of chaos in the Auckland city centre

## 2 Engage

Early engagement with the community to get ideas on how to mitigate the impacts of construction

- ✓ Modify consultation process to include section on activation ideas
- ✓ Invite local communities to be part of the activation process – as the local experts

## 1 Embed

Budget for activation during construction

- ✓ Include activation as a mandatory component of all public construction projects of a certain size
- ✓ % of project cost towards activation
- ✓ Funding to be utilised case by case basis

## 4 Enhance

Take advantage of disrupted period to trial community ideas

- ✓ The activation plan is implemented and maintained by the contractor
- ✓ Measure performance and adapt activation plan as required
- ✓ Strengthen relationships between all parties involved

## 3 Engineer

Creative and tactical use of unused construction space

- ✓ Analyse activation ideas from the community
- ✓ Assess construction site to create space for community ideas, including making better use of under-utilised locations close to construction site
- ✓ Create an activation plan during design phase
- ✓ Incorporate the activation plan as part of the physical works tender
