

Decarbonising Transport

Design Charrette - finding opportunities
and constraints in reducing transport
carbon emissions

How the design charrette will work?

- Each day we will post a high-level decarbonising transport themed question on a poster at the Standing Charette Table (this question will also be in your app)
- We would like everyone at the conference to include ideas/examples around the daily questions

Designed to gather feedback and provoke thought throughout the conference

There is also a sign up sheet for people interested in a continual industry dialogue on reducing transport emissions.

DAY 2's: High-Level Decarbonising Themes

What is the opportunities and constraints of different policy/legislation/ budget that relates to the transport industry in New Zealand for reducing carbon emission in New Zealand?

Purpose: Getting the industry talking about opportunities and constraints to reduce transport.

How you can get involved:

1. Visit the posters in the exhibition room downstairs
2. Jump on to the app and answer the daily questions

Enjoy the rest of your conference!

Decarbonising Transport

Design Charette - Finding Opportunities
and Constraints to redcuig transport
carbon emissions

TG Committee - Auckland Branch

#TGNZ21

DAY 1's: High-Level Decarbonising Themes

What is the opportunities and constraints of different transport industry professionals for reducing carbon emission in New Zealand's?

What do you think are the opportunities and constraints to decarbonising transport in our industry?

We have set up an interactive standing charrette for you to express your opinions and ideas

How the design charette will work?

- Each day we will post a high-level decarbonising transport themed question on a poster at the Standing Charette Table AND THE SAME QUESTION IS ON YOUR APP
- We would like everyone at the conference to write ideas/examples of the daily theme and the opportunities and constraints you see relating to your example.

Purpose: Getting the industry talking about opportunities and constraints to reduce transport.

How you can get involved:

1. Visit the posters in the XXX room
2. Jump on to the app and answer the 3 daily questions

and Constraints to redcuig transport
carbon emissions

TG Committee - Auckland Branch

#TGNZ21

Are you more hopefully that the industry will reduce transport emmssions in the future?

What do you think are the opportunities and constraints to decarbonising transport in our industry?

We have set up an interactive standing charrette for you to express your opinions and ideas

How the design charette will work?

- Each day we will post a high-level decarbonising transport themed question on a poster at the Standing Charette Table AND THE SAME QUESTION IS ON YOUR APP
- We would like everyone at the conference to write ideas/examples of the daily theme and the opportunities and constraints you see relating to your example.

DAY 3's: High-Level Decarbonising Themes

What is the opportunities and constraints of different design guidelines and processes that relates to the transport industry in New Zealand for reducing carbon emission in New Zealand?

Purpose: Getting the industry talking about opportunities and constraints to reduce transport.

How you can get involved:

1. Visit the posters in the XXX room
2. Jump on to the app and answer the 3 daily questions
